

PURUSHOTTAMA KAVYA

Software Engineer | Full-Stack & AI Developer

pkavya1112003@gmail.com | +91 8331956677 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with production internship experience building scalable full-stack software development solutions using Python, FastAPI, React, Docker, REST APIs, and production-grade AI systems including LangChain and Retrieval-Augmented Generation (RAG). Focused on building reliable, scalable software systems and applying modern technologies to solve real-world engineering problems.

SKILLS AND TECHNOLOGIES

Programming Languages:	C++ , Python, JavaScript, TypeScript, SQL
Backend Technologies:	FastAPI, Node.js, Express.js, Flask, REST APIs, Microservices, JWT Authentication
Frontend Technologies:	React.js, Vite, HTML/CSS, Tailwind CSS, Bootstrap
Databases:	PostgreSQL, MongoDB, MySQL, Redis, Qdrant, SQLite
AI & LLM Technologies:	RAG, LangChain, Prompt Engineering, Semantic Search, Embedding Models, Vector Databases, LLM APIs (OpenAI, Gemini, Groq), Agentic Workflows
DevOps & Tools:	Git/GitHub, Docker, Nginx, Postman, Linux, Figma, Google Workspace, Confluence, Jira

WORK EXPERIENCE

AI Engineer Intern | Datai2i Pvt Limited Mar 2026 – July 2026

- Contributed to AI, full-stack, and infrastructure development across 2 production platforms, including API design, Dockerized deployments, debugging, testing, documentation, and Agile code reviews.

CareerGini – AI Career Readiness Platform

- Owned end-to-end development of 4 core modules (Gini Chat, Learning Hub, Capstone Projects, GiniCode), owning the implementation from database schema design to React frontend development, while configuring Nginx for local routing.
- Integrated AI-powered learning workflows using OpenAI and LangChain across 3 Dockerized microservices, connecting FastAPI, Node.js, PostgreSQL, and REST APIs to deliver personalized learning paths.

DiziGini – AI Outreach Automation Platform

- Designed a FastAPI pipeline processing unstructured brand data into AI-generated HTML email templates for over 10,000 users using intent-specific AI workflows, implementing OAuth2-based domain access control.

Associate Software Engineer Intern | Tecnicos Integration Technologies Nov 2024 – Mar 2025

- Maintained and enhanced backend modules in C++ and Python, integrating REST APIs while applying object-oriented programming, modular software design, and Agile development practices across production systems.
- Optimized MySQL and MongoDB queries, reducing data retrieval latency by 10% via targeted indexing and query restructuring across production databases.
- Debugged and resolved 15+ production issues through root cause analysis, improving software quality, reliability, and production uptime.

PROJECTS

DocuMind AI – AI Knowledge Workspace

FastAPI • React • TypeScript • PostgreSQL • Docker • LangChain • Ollama • Qdrant • RAG

- Built a multi-tenant AI knowledge workspace supporting PDF, DOCX, TXT, and Markdown using Retrieval-Augmented Generation (RAG), enabling semantic search and citation-aware conversational AI.
- Architected modular backend architecture, JWT authentication, REST APIs, and containerized deployment for scalable software systems.
- Designed and implemented an end-to-end document ingestion pipeline featuring document extraction, chunking, vector indexing, pluggable LLM providers, and secure per-user data isolation.

Vulnerability Scanner

Python • Flask • Bandit • OWASP ZAP • NVD API

- Created an automated security scanner integrating Bandit, OWASP ZAP, and the NVD API to identify 60+ vulnerabilities, classify them using CVSS severity scoring, and automate vulnerability analysis across multiple security scanners.
- Developed a Flask REST API that generated remediation reports, eliminating manual vulnerability lookups across three security scanners.

GeoInsights – MLH Frost Hacks National Winner

React • React Native • MongoDB • Geolocation APIs

- Coordinated a team of 4 to build a cross-platform incident reporting application using geolocation APIs and responsive mobile interfaces.
- Won **Best Use of MongoDB** at MLH Frost Hacks while competing against teams across India.

EDUCATION

Vignan's Institute of Information Technology
Bachelor of Technology (Computer Science Engineering), CGPA: 8.33

Visakhapatnam, Andhra Pradesh
Graduated: May 2025

ACHIEVEMENTS & CERTIFICATIONS

- National Hackathon Winner** – MLH Frost Hacks, Best Use of MongoDB; led team end-to-end from ideation to working product.
- GSSoC '24** open-source contributor – merged PRs to web technology projects.
- Solved **200+** problems across LeetCode & CodeChef.
- Certifications:** Python Programming Fundamentals • Google AI Essentials • Cybersecurity Foundations • Postman API Fundamentals
• NoSQL • Effective Communication
- Extracurricular:** National Athlete & **NCC-B** Certificate holder.
